

The Last Android: Beware, not beware, The First Intelligence (Volume 1)

They were called humans... an armada of carbon and water based humanoids from the earth region of space. A predatory species with the technology to back them up. Such were the thoughts of Ness Unit 1A while preparing for their arrival to Planet Ness, an android planet still under control by Central through an ancient program still imbedded in the androids circuitry, implemented by a kingship called the Interpreter millions of years extinct. Along with the Zetons, a of exquisitely crafted androids under their Over Cri, Ness knew it was only a matter of time before they, like all others before, would be put through a horror beyond their imagination. How to prevent the massacre and escape Centrals experimental chamber as well as Tracker, the invincible police droid of Planet Ness, was paramount to their survival, Ness included due to his exile from Ness City.
