# Modelling High-level Cognitive Processes

MODELLING
HIGH-LEVEL
COGNITIVE
PROCESSES

Richard P. Cooper

This book is a practical guide to building computational models of high-level cognitive processes and systems. High-level processes are those central cognitive processes involved in thinking, reasoning, planning, and so on. These processes appear to share representational and processing requirements, and it is for this reason that they are considered together in this text. The book is divided into three parts. Part I considers foundational and background issues. Part II provides a series of case studies spanning a range of cognitive domains. Part III reflects upon issues raised by the case studies. Teachers of cognitive modeling may use material from Part I to structure lectures and practical sessions, with chapters in Part II forming the basis of in-depth student projects. All models discussed in this book are developed within the COGENT environments. COGENT provides a graphical interface in which models may be sketched as box and arrow diagrams and is both a useful teaching tool and a productive research tool. As such, this book is designed to be of use to both students of cognitive modeling and active researchers. For students, the book provides essential background material plus an extensive set of example models, exercises and project material. Researchers of both symbolic and connectionist persuasions will find the book of interest for its approach to cognitive modeling, which emphasizes methodological issues. They will also find that the COGENT environment itself has much to offer.

Modelling High Level Cognitive Processes Pdf an evaluation of business process model techniques, using - an evaluation of business.This book is a practical guide to building computational models of high-level cognitive processes and systems. High-level processes are those central cognitiveRead Modelling High-level Cognitive Processes by Richard P. Cooper With Contributi with Rakuten Kobo. This book is a practical guide to building Modelling High-Level Cognitive Processes by Richard P. Cooper, 9780415650236, available at Book Depository with free delivery worldwide.High-level processes are those central cognitive processes involved in thinking, reasoning, planning, and so

on. These processes appear to share representational and processing requirements, and it is for this reason that they are considered together in this text.Amazon??????Modelling High-level Cognitive Processes??????????Amazon?????????????Richard P. Cooper With Contributi, PeterThis book is a practical guide to building computational models of high-level cognitive processes and systems. High-level processes are those central cognitive.
