

The unpublished writings of Helmut Hasse, consisting of letters, manuscripts and other papers, are kept at the Handschriftenabteilung of the University Library at Göttingen. Hasse had an extensive correspondence; he liked to exchange mathematical ideas, results and methods freely with his colleagues. There are more than 8000 documents preserved. Although not all of them are of equal mathematical interest, searching through this treasure can help us to assess the development of Number Theory through the 1920s and 1930s. The present volume is largely based on the letters and other documents its author has found concerning the Brauer-Hasse-Noether Theorem in the theory of algebras; this covers the years around 1931. In addition to the documents from the literary estates of Hasse and Brauer in Göttingen, the author also makes use of some letters from Emmy Noether to Richard Brauer that are preserved at the Bryn Mawr College Library (Pennsylvania, USA).

Diet Cookbook Box Set: The Belly Fat Burnin Recipe Book Series For Losing Weight FAST With The Leptin Diet & Ketogenic Diet (Low Carb Diet, Weight Loss Series), The Fifth Sacred Thing, Scourge of Stars: Book Two of The Sigil Trilogy, Nanotime, Genetics Laboratory Investigations (13th Edition), Caribbean Island: A Dark Psychological Thriller,
